

## LEASEWEB CDN

# Get lightning-fast performance with our next-gen CDN

Built on our globally distributed network, the Leaseweb CDN combines our hardware and network expertise to bring you closer to your users and delivers your content anywhere, anytime with lower latency and increased performance.

### Without Leaseweb CDN

Content is all served from the origin location. This uses processing power and bandwidth, resulting in content taking longer to reach the user, increased load, and an inferior user experience.

### With Leaseweb CDN

Content is served from the closest Leaseweb CDN cache. This reduces load on your origin servers and provides content faster to the user, resulting in a superior user experience.

### What we offer

#### 1. Better user experience

Avoid slow loading pages and long buffer times and ensure high-quality experiences for your audience.

#### 2. Lower Infrastructure Cost

Reduce costs by using our network and infrastructure rather than your own.

#### 3. Increased Security

Attacks are routed through our servers so we can mitigate the attack before it reaches your origin.

### Benefits:

1. Latest Technology
2. Optimized for video streaming
3. Large file distribution
4. Maximum Offload
5. 24/7 Support
6. Transparent pricing

# Pricing

	2TB	25 TB	500 TB	1 PB/10GBPS
OVERAGE COSTS	€0.05 PER GB	€0.03 PER GB	€6 PER TB	€5 PER TB/ €0.5 PER MBPS
HTTPS TRAFFIC INCLUDED	✓	✓	✓	✓
UNLIMITED DOMAINS	✓	✓	✓	✓
STORAGE INCLUDED	2GB	2GB	1TB	1TB
FLAT PRICE WORLDWIDE	✓	✓	✓	✓
MONTHLY PRICE	€49	€499	€2990	€4500

Looking for additional options and features or higher bandwidth at prices as low as €3 per TB overage? Get in touch to discuss the possibilities.

## Features

### CDN Resources

- Unlimited zones/domains • Instant purge
- Pre-fetch files functionality • Header modification
- Cache expiry settings • Cache query strings • Ignore set cookies
- Bandwidth throttling

### Dashboard/Portal

- Intuitive design
- Control your account, billing and CDN resources from one place
- Localize your preferences
- Reseller functionality included

### Reporting and Analytics

- Real time analytics
- Bandwidth and traffic graphs
- Cache hit/miss ratio
- HTTP status code reporting
- View data between specific time frames
- Report/statistics through your dashboard or API

### “Always On” Support

- Direct contact with our developer team by email or phone
- Our comprehensive Knowledge Base is always available

### Network

- Global network with more than 5Tbps capacity
- Up-to-the-minute status updates
- Full control over the entire global network
- DNS anycast network

### Security

- SSL Certification
- Secure Token URL
- Geoblocking
- Hotlinking Protection • IP/Domain blacklisting • DDoS protection

### Object Storage

- Replicated 3 times
- S3 compatible
- Top-notch security
- Read more on the Object Storage page

### Billing

- Electronic invoices
- Payment history
- Flexible payment methods (transfer, PayPal, credit card, direct debit)
