

## LEASEWEB CYBERSECURITY

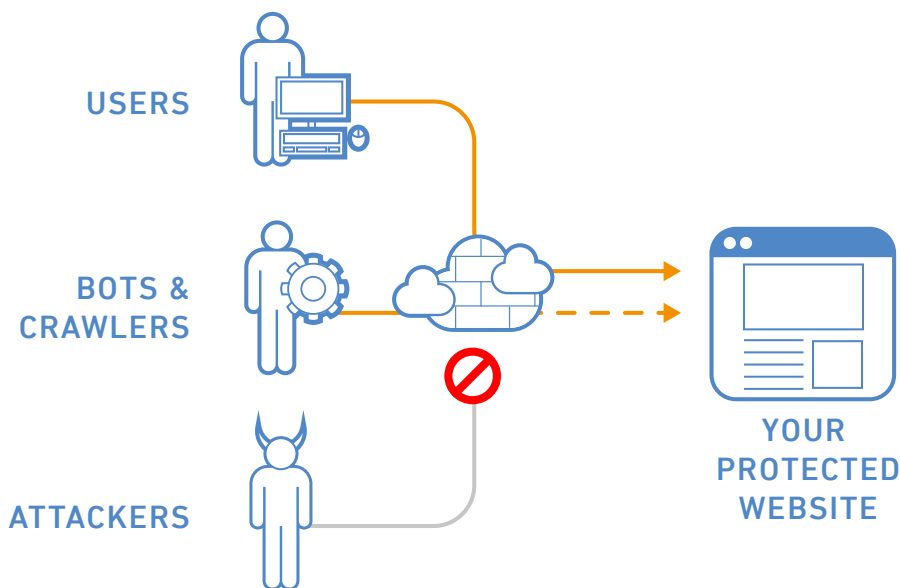

WEB APPLICATION FIREWALL & ANTI-DDoS SOLUTION

# Spammers, data-breaches, DDoS? Always stay one step ahead

Protect yourself against ever more sophisticated attacks with our best-in-class, always-on solutions. With instant threat updates across all Points of Presence and constant monitoring of the Dark Web plus threat intelligence by our cybersecurity teams, you can be sure your protection is solid and scalable at a very competitive price.

### Cybersecurity that matches your needs

With the help of our experts and the 24x7 Security Operation Center, you can constantly analyze your vulnerability and mitigate threats with a high degree of customization. Configurable rule sets mean you can adjust your security posture, monitor suspicious traffic and respond to threats with ease.

Our Web Application Firewall (WAF) identifies and filters traffic from multiple locations and only lets legitimate requests through.

### Benefits

1. Cloud-based best-in-class web application security platform
2. Globally distributed Cloud infrastructure with strategically distributed SuperPOPs
3. Mitigate complex application-layer attacks using sophisticated algorithms
4. White-glove managed service with 24x7 Security Operations Centers
5. Cybersecurity experts at your side for real-time mitigation of attacks
